HOLOGRAM

Holo Image has a vast range of Holograms like 2D, 2D-3D, Flip Flop, 4 Channel, Three layer, Dot Matrix, E Beam technologies and Hi Resolution. We also have wide varieties of sizes ranging from 10mm x 10mm upto 150mm x 150mm. We can provide upto 23 types of securities in a hologram like Hidden Text, Animation effects, Microscopic Letters, Laser Viewable features.

PLAIN LABEL

A label (as distinct from signage) is a piece of paper, plastic film, metal, or other material affixed to a container or product, on which is written or printed information or symbols about the product or item. Information printed directly on a container or article can also be considered labeling. Labels have many uses, including providing information on a product's origin, manufacturer (e.g., brand name), use, shelf-life and disposal, Maximum Retail Price, Barcode & other mandatory information.

PRINTED PAPER LABEL

We hold expertise in offering a wide range of Product Label (printed-product-label) These are widely preferred by various numbers of clients owing to its high clarity, optimum finish and excellent design. Our products are manufactured from top quality raw material which are sourced from trustworthy vendors of the industry. Our Printed Product Labels are acclaimed for their easy maintenance and longer service life.

PRINTED PAPER LABEL WITH HOLOGRAM

We are presenting a quality tested array of Holographic Labels (printed label). The Holographic Labels we offer is recommended by the clients for their safe use. Our products are made under the skilled expertise of our professionals, as they have advance knowledge of domain.

TRANSPARENT LABEL

The Transparent Holograms stickers are suitably utilized with the products, where product surface is needed to be visible along with the brand protection. These holograms are designed cautiously by making use of optimum quality materials and adhesives to laminate as a normal lamination. Various sizes, shapes, designs, and color patterns are provided by us to meet with the variegated industrial requirements. We are one of the leading manufacturers of transparent hologram all over India. We can provide them the best services as per their needs.

THERMAL TRANSFER RIBBON

Thermal Transfer Ribbon is basically a polyester film on which are coated different layers. Ink layer is transferred to the label thanks to the heat delivered by the thermal head of the thermal printer.

THERMAL BARCODE PRINTER

Thermal Barcode printers are the perfect solution for long term labeling as they utilize a ribbon for printing. As the printhead applies heat to the ribbon, it melts onto the label surface which can be a variety of materials including polyester and polypropylene. With a longer life-span and options for rugged label materials, thermal printers are ideal for product labeling, inventory and asset tracking, and outdoor applications.

BILLING PRINTER

Bill Printing Machine is widely used in retail business and is extremely useful device. You can use this Bill printing machine for Supermarket, hotels, grocery shop and so on. The Bill printing machines work on a process called Thermal printing which basically means that it uses heat to print the things on the paper. The technology is quite old but ideal for these bill printing machines.

POS MACHINE

A POS system is synonymous with POS terminal. However, a POS terminal is the electronic equipment performing the sales transaction and processing the credit card payments. Used in most storefront businesses, a computer terminal combined with the POS software helps to manage everyday sales transactions and operations.

SCANNER

A bar code reader (or bar code scanner) is an electronic device that can read and output printed barcodes to a computer. Like a flatbed scanner, it consists of a light source, a lens and a light sensor translating for optical impulses into electrical signals. Nearly all barcode readers contain decoder circuitry analyzing the bar code's image data provided by the sensor and sending the barcode's content to the scanner's output port.
